CAREER OBJECTIVE

After completing my B.Com, I spent three years preparing for competitive exams, which helped me build discipline and problem-solving skills. During this time, I discovered my passion for web development and learned frontend skills. I created a food order mini-site project independently and am now looking to start my career as a web developer, eager to learn and grow in this field.

PROJECT

Employee Details Management System

- Developed an employee management application using HTML, CSS, and ReactJS.
- Designed a simple CSS layout for user-friendly data entry forms. Implemented functionality to add employee details, displaying them within an HTML table.
- Enabled edit and delete options for each employee entry, allowing for seamless data modifications.
- Ensured efficient state management in ReactJS to dynamically update the table upon any data changes . [click](#)

User Form Details

- Developed a React-based form application with dynamic input validation and modular components.
- Used custom hooks to manage state and validation, ensuring reusable and efficient logic.
- Designed a responsive UI with CSS, enhancing usability across desktop and mobile devices.
- Integrated mock APIs for simulating data handling and submission processes.
